

AQ Inductive Components

aq

AQ Group is a global manufacturer of components and systems for demanding industrial customers. The consolidated knowledge in the AQ Group, along with a global presence, offer unique benefits to customers around the world.

AQ Group has since its inception in 1994 shown a steady and fast growth. The Group has approximately 3900 employees, whereof 70% in countries outside Sweden.

The annual turnover is € 270 Million. AQ Group is listed on AktieTorget in Sweden and has the highest credit rating AAA.

WE ARE RELIABLE

The AQ Business concept is to develop, manufacture and assemble components and systems for demanding industrial customers and leverage our commitment to Total Quality to ensure our customers become long-term business partners.

We target customers who are world leading in their respective niches, such as road and off-road vehicles, railroads, power transmission, telecommunication, food, etc. To be a world leading company, they have to work with world leading suppliers!

AQ aims to be a world leader in cost effectiveness, quality, on-time-delivery, alertness and service. In one word – reliable.

The AQ Group has grown constantly at a steady pace all from the start 1994 to today's position as a true global actor. Our finances are strong and we will continue our growth, both organically and by acquisitions.

Guidelines for application design

For correct choice of transformer

The power rating is determined by adding the apparent secondary power figures (VA). The power ratings stated on the data sheet are the maximum power ratings in continuous operation.

If the transformer is subject to intermittent load the type size can be reduced. the amount of reduction depends on the nature of the intermittency and must be calculated in each individual case.

If an autotransformer is required, type ratings can be calculated using the following formula:

$$P_{type} = P_{out} \times (U_{max} - U_{min}) / U_{max}$$

where P_{out} is the power drawn and U_{max} / U_{min} is the highest/lowest voltage.

If the cooling of the transformer is reduced by building-in the power ratings in the tables must be reduced.

The derating factors applicable to de maximum power ratings are:

- 15% for + 50°C ambient temperature
- 30% for + 60°C ambient temperature
- 40% for + 70°C ambient temperature

The transformers are designed for 50Hz but they can be used at 60Hz.

Primary fuse

In view of the rush-in current, a delayed –action fuse with a current rating above $I_{max} \times 1.15$ is recommended.

Ordering information

- Quantity and type
- Power rating(VA)
- Degree of protection
- Ambient temperature
- Primary voltage
- Secondary voltage
- Connection arrangement (for three-phase)

Non-enclosed 1-phase transformer 15-1600 VA

If trolley is included, dim. A should be increased with 60 mm

Non-enclosed air inductor 0.030-5 kVAr

Characteristics

Type	SLOA
Frequency	D.C. – 50 Hz
Temp. class	F (155°C)
Ambient temp.	Normally 40°C
Winding Cu or Al strip	

Non-enclosed 1-phase air inductor 0-1000 kVAr

Characteristics

Type	Strip: SLOA Wire: SLOC
Frequency	D.C. – 50 Hz
Temp. class	F (155°C)
Ambient temp.	Normally 40°C
Winding Strip or wire of copper or aluminum	

Non-enclosed 1-phase toroidal power transformers

Characteristics

Voltage	Up to 600 V, higher on demand
Frequency	50-60 Hz
Temp. class	class A (105°C), higher on demand
Cooling method	AN
Protection index	IP 00
Ambient temp.	40°C
Applicable standards	EN 61558
UL-recognized marking	Available on request

*Other types on demand.

Quality and testing

100% electrical, mechanical and visual control is applied. Equipment to carry out tests required by IEC standard is available.

Special testing is performed in collaboration with accredited external laboratories.

Typical in-house tests:

- No load test
- Short circuit test
- Inductance measurement
- Resistance measurement
- BIL impulse test up to 100 kV
- Heat-run test
- DC measurement up to 3000A with AC superimposed current
- Dielectric test in AC up to 100 kV
- Partial discharge test
- Water leakage test

All design and manufacturing processing are certified according to the following standards:

- EN ISO 9001/2008
- IRIS
- EN 15085-2 CL1
- EN 3834-2
- EN ISO 14001
