

Environmental Policy

AQ Inductives Hungary Kft. develops, manufactures and assembles inductive components and systems for demanding industrial customers. With our commitment to Total Quality our customers become long-term partners.

We are committed to maintain and continually improve Environmental management system fulfilling all applicable requirements to enhance environmental performance. We are actively cooperating with all involved authorities and stakeholders in solving matters related to environmental protection.

- | Business shall be carried out so that natural resources are conserved and the environment is protected.
- | Our business and processes are designed in such a way that energy and resources are used efficiently and waste and rest products are minimized over the life cycle of our products.
- | We shall follow regulations and legal requirements, continuously work with improvements to reduce or prevent our environmental impact – from design to delivery.
- | All employees are responsible for the environment.

WE ARE RELIABLE
