

2020

AQ Group Communication on Progress and Sustainability report

Anders Carlsson
AQ Group AB

AQ Group Communication on progress

Purpose

The purpose of this report is to describe AQ Group's progress with respect to the ten principles of the UN Global Compact.

Scope

This report applies to AQ Group and covers the period from joining the UN Global Compact initiative in September 2012 until December 31st, 2020.

Statement of continued support

December 31st, 2020

To our stakeholders:

I am pleased to confirm that AQ Group AB reaffirms its support of the ten principles of the UN Global Compact in the areas of Human rights, Labor, Environment and Anti-corruption.

In this annual Communication on Progress for 2020, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations. We also commit to sharing this information with our stakeholders using our primary channels of communication.

Sincerely yours,

Anders Carlsson
CEO

Report structure

This year AQ Group has made a sustainability report that is included in its annual report. The sustainability report is made in accordance with UN global compact framework and is base for our communication report.

AQ Group Sustainability report 2020

AQ Group was founded in Sweden in 1994 and consists today of about 5900 employees, with a large share working in growth countries outside Sweden. We are a global manufacturer of components and systems for industrial customers with high demands around the world. AQ Group consists of seven business areas which are Electric cabinets, Wiring systems, Precision stamping and injection molding, Sheet metal processing, System products, Inductive components and Special technologies.

We take pride in being a reliable supplier by producing products with high quality, delivered on time in a sustainable way. AQ group has been an active member of the UN global Compact since 2012.

AQ Group has set 10 principles and goals for its sustainability work. The principles correspond to the principles set forth by the UN Global Compact framework. In our sustainability report we will present the goals and principles, how they are implemented and a presentation regarding goals and results.

Human Rights Principles

Principle 1: Support and respect the protection of internationally proclaimed human rights; and

Principle 2: make sure that we are not complicit in human rights abuses.

Assessment, Policy & Goals

AQ Group's goal is for all our employees and business partners to live up to the Universal Declaration of Human Rights. The goal is to have zero human rights violations reported.

Our core values and code of conduct outlines the way each of us should behave and clarifies

our responsibility to report instances of human rights violations.

The Code of Conduct is known to all employees within the company. Also, our immediate supply chain should adhere to the same principles. The principles are clearly stated in the AQ Supplier Code of Conduct.

Implementation

This year AQ Group continued implementation of its core values, which were established in early 2012, across all AQ companies. One of the cornerstones of the core values is “Courage and Respect” including the principles, “Every employee has the same status” and “We treat others as we like to be treated ourselves”. A copy of the AQ Core Values booklet has been handed to each employee in their local language. Workshops have taken place to further strengthen the understanding of the core values across the company. This together with the AQ Code of Conduct gives guidance how to act within AQ Group in any given situation.

Suppliers are regularly audited using a standard template which contains a section on human rights and that they are required to adhere to the AQ Group Supplier Code of Conduct. Suppliers who have questionable ethics are not approved as an AQ supplier.

All employees and external stakeholders can report violations directly by sending a message to whistleblower@aqg.se should there be any violations against human rights.

Measurement of outcomes

In AQ Group there has been no reported incidents of human rights abuses during the year. If any issues should occur in the future they will be recorded and brought to the attention of group management and the relevant authorities. AQ Group is fully

committed to handle any such occurrences objectively and to act quickly.

In the last five years we have had zero human rights violation reports in AQ.

In addition to this AQ is supporting the Hand in Hand foundation in India . We donate money to prospective entrepreneurs in the village to help them to a better life. During 2020 the support have been directed to prevent Covid-19 spread.

AQ employees in India take an oath to comply with AQ Group Core Values

Labor Principles

Principle 3: Uphold the freedom of association and the effective recognition of the right to collective bargaining;

Principle 4: uphold the elimination of all forms of forced and compulsory labor;

Principle 5: uphold the effective abolition of child labor; and

Principle 6: the elimination of discrimination in respect of employment and occupation.

AQ Group hires and treats its employees in a manner that does not discriminate regarding sex, transgender identity or expression, ethnicity, religion or other belief, disability, sexual orientation, age, political opinion, social origin, HIV/AIDS status and trade union membership. Diversity in the workplace is encouraged at all levels.

Assessment, Policy & Goals

Our Code of Conduct shows clearly employee rights and responsibilities.

All employees work here willingly, and no employee is forced to work overtime unless it is ordered legally and according to contract.

In AQ Group we have a non-discrimination policy that take stand against all kind of discriminations and this is stated clearly in our code of conduct.

We uphold the law and our ethical responsibility by only employing people of a legal working age.

The AQ Group goal for Labor Principles is to have an average self-assessment score higher than 3.5 and that no subsidiary should score below 3 in our yearly self-assessment where the lowest score is 1 and highest is 4.

Implementation

The labor unions in AQ Group are working well. AQ applies collective agreements that are negotiated by the parties and follows laws and regulations in the countries where we operate.

With regards to the safety of our employees we evaluate, and audit working conditions and make sure that the correct protective clothing and equipment is used.

We fully commit to providing a safe working environment. New employees receive relevant orientation training to carry out their tasks safely and existing employees receive continuous training at various intervals based on their need to be able to perform their respective tasks.

We have during the year worked intensively on health and safety. This is something that helps us becoming a more attractive employer as well as creates a better functioning business. Special focus has been put on working with identifying

risks and leadership to getting more people involved with safety related work. As a result of this the number of lost time incidents in AQ Group have been reduced with 40% between 2019 and 2020.

Measurement of outcomes

AQ Group Board of directors consists of five men and two women. In the AQ Group management team four are women and seven are men. Within the entire AQ Group, we have an even gender distribution with 45% women and 55% men.

AQ has since 2015 implemented a company self-assessment that is done by the management of every subsidiary within the group. This gives the group management a good understanding of how well the principles in UN Global Compact are adhered to. The results from the survey 2020 show high scores on average. Action plans are made locally to adress improvement areas.

In 2020 the score for Labor principles was on average 3,83 on a scale from 1 to 4 where 4 is highest. No subsidiary within the group has scored lower than 3.

AQ Group's subsidiaries are continuously being audited by our customers. During 2020 we have passed audits from but not limited to, Volvo, Scania, ABB, Siemens, Bosch, Alstom, GE, Ericsson, Bombardier and Tetra Pak, These companies focus strongly on corporate social responsibility which helps us to comply with Labor Principles.

Environmental Principles

Principle 7: Support a precautionary approach to environmental challenges;

Principle 8: undertake initiatives to promote greater environmental responsibility; and

Principle 9: encourage the development and diffusion of environmentally friendly technologies.

Assessment, Policy & Goals

In our Environment Policy, available on our web site, we publicly share our environmental viewpoint: “Our business and processes are designed in such a way that energy and resources are used efficiently, and waste and rest products are minimized over the life cycle of our products”.

We shall comply with rules and legislation and constantly work with improvements to reduce or prevent our environmental impact, from design to delivery.

The AQ environmental goals are to have all AQ production sites certified in accordance with ISO 14001 and to have a score higher than 3 on our annual self-assessment.

During 2020 we have done more to reduce carbon dioxide emissions. This is a clear requirement from shareholders, society, employees and other stakeholders. Within the Group we have chosen to act through our environmental management systems. During 2020 we have implemented ISO 14001 in all our production units. We have also made sure that we have concrete goals and actions to reduce carbon dioxide emissions in all companies.

Implementation

Environmental concerns and improvements are part of our daily work and continuously being worked up in our subsidiaries. We conduct risk analysis when necessary and work according to our management systems. We work according to the precautionary principle by avoiding materials and methods related to possible environmental- and health risks when other alternatives are available.

We also share best practices between our sites through our CEO’s weekly newsletter. One example of this is the widespread implementation of LED lighting in most of the AQ production units and offices to reduce electricity consumption. Another example is the use of heat exchangers in our plants to reuse excess heat from production processes.

A major environmental impact is the truck transports that takes place between our suppliers, our factories and our customers. Here we work to reduce our truck transports through more efficient transport solutions. We offer production in many countries close to customers and suppliers. We also participate as a supplier in the transportation industry’s transition to new fuels and technologies.

Measurement of outcomes

At the start of 2020 we have performed follow-up meetings with all our operational companies and reviewed the work with the environment management system, performance during 2020 and goals for 2021. Of the Groups 40 production units all have a certified ISO 14001 management system.

All units are securing that national environmental laws are followed. This is secured on group management level through the AQ Group Self-assessment procedure. The environmental score for 2020 was 3,84 where 4 is highest.

Some of the concrete actions that have been done in the past years to improve the environment,

- AQ is supplier to companies with purifying ballast water that protect the biodiversity of our oceans
- The Covid-19 pandemic has led to a drastic reduction of air travel and a

widespread use of digital meeting technology

- Many of the AQ factories have implemented LED lighting and motion sensors to reduce energy consumption.
- AQ has four production sites that have installed solar panels or solar heating devices.
- All AQ's facilities in Sweden are powered with 100% renewable energy.
- Many of AQ's production facilities reuse the heat generated from production processes to heat the factory.
- Many companies have installed so called BMS systems to better control and monitor their consumption of energy for heat, cooling and ventilation.
- AQ is as a supplier actively taking part in the major development trend from conventional to electric commercial vehicles.
- We work to reduce scrap percentage from the material we use. This is for example done by improved programming in sheet metal working machines and by adapting the design together with our customers.
- We continue the work to increase the recycling of rest products from the injection molding process. We grind it and reuse it in our injection molding process.
- We continuously reduce hazardous chemicals in cooperation with our customers.
- We implement processes to minimize and reuse packing material in cooperation with our customers.

Anti-Corruption Principle

Principle 10: Work against corruption in all its forms, including extortion and bribery.

Assessment, Policy & Goals

AQ Group puts great emphasis on building trust and long-lasting relations with our employees, customers and suppliers. It lies in our business ethics to always follow laws and regulations as a minimum requirement in all countries we operate.

We do not, under any circumstances, accept bribery, extortion or any other kind of corrupt activities. It is stated in our code of conduct that we shall always conduct good business ethics and that we do not offer rewards or benefits, which conflict with laws or regulations, to customers, suppliers or authority representatives.

Every employee that is involved in business transactions receive training on our code of conduct and our supplier code of conduct which clearly indicates our stance on corruption: "If an employee is offered a gift, a bribe, an illegitimate commission, or any other form of personal payment, it must not be accepted." A preliminary evaluation of the risk of corruption has been made. The biggest risks come in the form of gifts and bribes from suppliers. Therefore, we have made this clear to our suppliers that it is strictly forbidden to give personal gifts to our employees

The AQ Goal for anti-corruption is to have zero reported corruption cases. We also stimulate a culture where you should raise your hand and advice your manager and colleagues if you are not sure what to do. This way we can advise and support the right behavior according to our Code of Conduct.

Implementation

It is all managers' responsibility to inform employees about our anti-corruption policy and code of conduct. All managers shall furthermore encourage employees to report on indications of any type of violation regarding these policies. Such reports can be done anonymously to the whistleblower@agg.se in accordance with our Whistleblower Policy.

To prevent the identified risks, we commit to several actions:

- Implementation of a rigorous procurement process including cross-functional approval of suppliers.
- All supplier shall read and commit to AQ Supplier Code of Conduct.
- Periodic market research of prices of key materials to be compared against existing purchasing prices.
- Reviews of personal expense claims.
- Addition of the Global Compact logo and description into our company presentation to our supply chain partners and customers
- When integrating new AQ companies in the Group we perform a workshop and work through AQ's Core Values and Code of Conduct.

Measurement of outcomes

We make it clear to our employees and supply chain partners that we will not accept corrupt behavior. If it were to happen in AQ Group, the relevant disciplinary and/or legal actions would be taken against the guilty parties.

Audits from senior management take place at various intervals to check that standard procedures are being followed. And to cement these principles the management of each

subsidiary need to commit to our principles in our yearly self-assessment. The score from the 2020 self-assessment was 3.94 on a 4-grade scale.

Whistleblower function

In 2016 the whistleblower@agg.se email and policy was implemented to make it safe to report violations for internal and external stakeholders.

In 2020 we have received two reported cases. The AQ group management team has analyzed them and taken actions in line with the process.

Sustainability risk assessment

AQ group has a process where the group and each subsidiary of the group makes an annual self-assessment. This is the foundation for our sustainability risk assessment. AQ Group has below identified the risks that could cause a probable negative effect on the sustainability of the company.

Risks related to Human rights, Anti-corruption and Labor principles

It is a potential risk that breaches of our principles could occur, if AQ Group fails to ensure that every employee understands and follows our AQ Code of Conduct. In 2018, initiatives were taken to ensure that each employee signs AQ's Code of Conduct, where they need to commit that they have understood and will follow its opinion. In Sweden we have implemented sign-off of Code of Conduct and AQ Core Values as part of the employment agreement.

AQ is doing its utmost to control that the full AQ supply chain respects and follows the rules set forth in the AQ Group Supplier Code of Conduct. We perform regular supplier audits and every supplier need to respect our code of conduct. It is a risk that our suppliers willfully or by lack of knowledge break our rules. AQ is

committed to mitigate this risk by constant monitoring of the supply chain.

Risks to the Environment

AQ has several surface treatment facilities with notifiable operations. An accident at a surface treatment facility can affect the environment. Furthermore, there is a risk that current and previous activities may have resulted in contamination of land where the activities have taken place from time to time. AQ Group is constantly monitoring the impact its operations have on the environment through the ISO 14001 management system approved production sites. This should mitigate most of the risks that our operations may harm the environment.
