Company presentation

AQ MAGNETRONICS s.r.o.

AQ Magnetronics s.r.o. in Trutnov has been a leading manufacturer of transformers, reactors and filters for over 60 years. Since the beginning of 2025, we have been part of the AQ Group, an international company with 8,250 employees. With 12 production sites worldwide, we combine technological expertise, quality and a global presence in the field of inductive components. We are renowned for our innovative and reliable solutions – and invite you to discover our products andhelp shape the future with us.

OUR EXPERTISE

- Worldwide delivery
- Specialized in customized solutions
- Over 60 years of industry experience
- Complete traceability of the carbon footprint
- Internationally certified

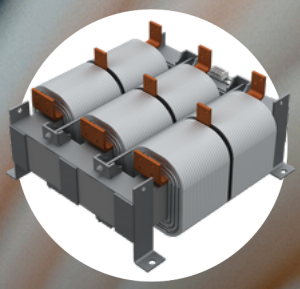

TRANSFORMERS

Power range up to 12.5 MVA

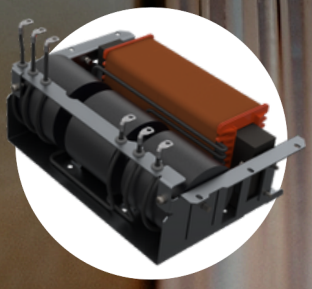

- Single-phase (TAM, TAT)
- Three-phase (TAP, TAU, TBU, TBR)
- Medium-voltage transformers

REACTORS

Power range up to 3000 kVA

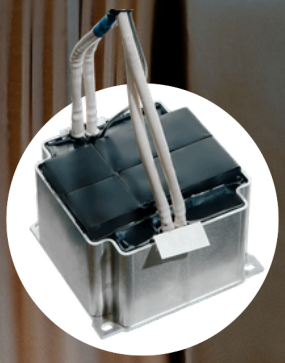

- Line reactors
- Output reactors
- Smoothing reactors

FILTERS

Power range up to 1.2 MW

- du/dt filters
- Sine wave filters
- Harmonic filters

MEDIUM FREQUENCY

Frequency range up to 150 kHz

- Reactors
- Transformers
- Special and custom parts
