

Wind energy

RELIABLE INDUCTIVE COMPONENTS IN THE FIELD OF WIND INDUSTRY

- Proven expertise in wind industry applications
- Specialize in custom made solutions
- Over 60 years of industry experience
- Full carbon footprint tracing
- Internationally certified

PERFORMANCE RANGE UP TO

50/60Hz	Medium frequency
< 4MVA	< 800 kVA
< 35kV	< 5 kV
< 3000 A	< 500 A
< 50/60 Hz	< 150 kHz

www.aqgroup.com

AQ Magnetronics s.r.o.

Water cooled

AQ has been a trusted producer of water-cooled transformers and reactors for decades, offering innovative cooling solutions for optimal performance and durability.

Medium frequency

AQ is a leading expert in medium frequency transformers, providing high-quality, reliable solutions tailored to your needs.

Air cooled

Since its founding, AQ has specialized in custom air-cooled solutions to customers in every corner of the globe.

DV/DT REACTORS

AQ dv/dt reactors protect wind turbine components from voltage spikes and reduce electromagnetic interference, ensuring reliable operation and maximizing performance.

GRID/LINE REACTOR

AQgrid/line reactors provide clean,stable power to the grid, protecting equipment and lowering maintenance costs. Our advanced R&D labs develop custom solutions that enhance efficiency and ensure long-term reliability.

AUX TRANSFORMER

AQ AUX transformers deliver stable power to wind turbine auxiliary systems, ensuring smooth operations. We offer custom solutions worldwide, enhancing turbine efficiency, safety, and performance with unmatched reliability.
